the unique approach in this book provides the historical background of alternative healing systems in addition to the most up to date information on scientific research plus basic clinical applications intended as an introduction to the topic of alternative medicine this book has become a standard among medical and health care professionals

although in the united states the scientific value of acupuncture is only now being clinically evaluated for the first time needling is only one of a number of therapeutic disciplines which have proved effective in china for over two thousand years and which today provide common remedies for more than one quarter of the world s population why asks dr porkert shouldn t medical men everywhere have access to the premises and results of this medical knowledge in this book he presents a coherent and systematic account of chinese theories the system of correspondence that underlies all of chinese medicine using a new and precise latin terminology with english equivalents provided for most terms that he devised over the past decade the book is based directly and exclusively on chinese sources including recent chinese secondary literature chapter 1 introduces the concepts that are the foundation of the system of correspondences the polar combination yin yang which provides a basis for the analysis of all phenomena into complementary groups and wu hsing which dr porkert calls the five evolutive phases and which are used to resolve cyclic processes into five temporally and qualitatively distinct parts in chapter 2 he takes up concepts which relate the body to the cosmos under the title phase energetics yun ch i these define meteorological climatic and immunological factors in health and disease chapters 3 and 4 focus on systems of concepts concerned with the body itself the author has named these systems orbisiconography sinarteriology and foraminology orbisiconography tsang hsiang the imagery of functional orbs

describes the relationships of the functional systems within the body it is not as Dr. Porkert points out analogous to but the opposite of western comparative anatomy sinarteriology the study of energetic conduits ching loo and foraminology the study of sensitive points shu hsueh indicate the functional relationships manifested at the body's surface as well as within it the book's systematic description of these disciplines involved in acupuncture is a powerful antidote to basic misconceptions prevalent in earlier western writing on the subject this is volume iii in the MIT East Asian Science Series edited by Nathan Sivin
